

GAMMA CRESCENT

GAMMA CHAPTER OF ALPHA GAMMA RHO FRATERNITY AT PENN STATE | FALL 2015

GAMMAS HANDLE CHALLENGES WITH POISE, FOCUS ON POSITIVE ASPECTS OF GREEK LIFE

There have been plenty of changes for Gamma Chapter this year, both challenging and rewarding ones. I think as a chapter, our alumni and undergraduate leaders have done an exceptional job at rising to the occasion and addressing each and every one appropriately. On the undergraduate side, we are in the final stages of an IRS audit examining nearly 10 tax years. The chapter has hired an accountant to help with the audit, and we decided to retain him to help track the budget on a regular basis and assist with annual tax returns. In doing so, we've managed to minimize the costs and have so far avoided any potential fines or penalties.

As we continue to improve upon agricultural development at Gamma, we will participate in the college career fair this semester and the AGP regional leadership seminar in March. We are in the midst of appointing a new chapter adviser to help **Bryan Dillehay, Alpha Theta '95 (Γ1638)** balance the role, as **Zach Larson '00 (Γ1445)** has recently resigned in order to spend more family time at home. Also, the

funds donated for new furniture brought some much-needed changes to the Great Hall, helping us to maintain our "touch of class." Outside of our chapter walls, there have been significant changes to Greek life at Penn State, including at the administrative level, as Dr. Baker recently announced his resignation as the Director of Greek Life. Our members face new challenges every day, and often find themselves in a hostile environment considering some of the recent negative publicity on fraternities. However, I am confident that our Gamma brothers will always represent us well as they continue to fulfill our purpose of making better men, and through them, a broader and better agriculture. If you have any questions at all, please do not hesitate to contact me at corey.simmons@me.com or (814) 777-3786.

Fraternally,

Corey Simmons '04 (Γ1504)

Gamma Alumni Association President

NOURSE

NATE NOURSE '86 (Γ1235) CULTIVATES AGP PRINCIPLES IN PROFESSIONAL ENDEAVORS

Born into one of Massachusetts oldest farming families, it was only logical to decide at the age of 13 to have a career in agriculture. As a full-time summer employee, I learned what it takes to be a general laborer, crop protectant applicator, and irrigator before the end of high school. I was fortunate to be exposed to every job on the farm. I've raised the family beef since second grade and still keep a dozen Herefords as a hobby.

As a Penn Stater, I started at Mont Alto campus. This is where I met my little brother, **Raymond "Jock" Sheaffer Jr. '87 (Γ1251)**. Thanks to the encouragement of long-time berry plant customer **Bill Yerkes '49 (Γ592)**, I rushed AGP in the spring of '85. I pledged in the fall and was initiated in the spring of '86. I graduated with a degree in horticulture in '88. I was involved in the Hort Club, played intramural sports, and was kitchen steward. I was known to whip up a monster brunch with the help of my brothers every now and then. AGP has played a large role in helping me build long-lasting relationships. My big brother, **Lenny Valenti '84 (Γ1218)**, and I attend chapter meetings at least once a year at Homecoming or Founders' Day.

I have been a sales director at Nourse Farms since 2003, working with my dad, Tim, and my mom, Mary. My two teenage sons help out, too, working full-time during the summer. We manage a full-time workforce of almost 100, who staff an office, lab, greenhouse, farm, and

Nate Nourse '86 (Γ1235) and his parents on their farm.

packing house operations. Located in the Pioneer Valley of Western Massachusetts, Nourse Farms is a premier grower of the best berry plants. The nursery has been producing dormant, bare-root plants for more than 80 years, serving commercial growers, wholesalers, and home gardeners throughout North America.

Established in 1932 in Andover, Mass., by Roger Lewis, the nursery was sold to the Nourses in 1968 and moved to its present site in Whately, Mass. It's located in the Connecticut River Valley of Western Massachusetts, where we are blessed with very fertile, well-drained soils. The farming operations now encompass some 800 acres in the towns of Whately, Hatfield, Deerfield, Montague, and Northfield, Mass. A satellite nursery in Pasco, Wash., produces about half of our raspberry plants and all of our asparagus roots.

Tim and Mary have always been forward thinkers, and in 1980 they created a state-of-the-art tissue culture laboratory and micro propagation facility at the farm. This was a bold step, allowing for all foundation material to be produced and virus tested onsite. The lab is currently one of a few private clean-plant centers in the U.S.

In 1982, a customized cooling facility was built, which has allowed storage of dormant, bare-root plants in ideal conditions. In 1987, the second storage facility was built. 2009 brought a standalone lab, a third cooler, and half-acre gutter-connected greenhouse. What was once solely a strawberry nursery with annual sales less than 1 million plants has become a nationally recognized small-fruit nursery, producing raspberries, ribes, blueberries, asparagus, rhubarb, and horseradish, and we ship more than 30 million plants a year.

"In the industry, I'm an active member and past president of the North American Strawberry Growers and North American Raspberry and Blackberry Associations. I'm on the executive boards for the New England Vegetable and Berry Growers Association and National Berry Crop Initiative. This spring, I was invited to join United Fresh Produce Association's Government Relations Committee. In 2016, I will become chairman of the National Clean Plant Network- Berries, which is now a permanent part of the Farm Bill. Having the ability to give back to the industry has helped me realize AGP's purpose of a broader and better agriculture.

I am truly grateful to have lived a charmed life, being able to work with so many industry leaders, and being a part of the AGP brotherhood. The foundation and principles of AGP have helped me realize accomplishments that I never could have dreamed."

THANK YOU, GENEROUS BROTHERS, FOR MAKING OUR CHAPTER ONE OF THE BEST

Thanks to the support of loyal alumni, \$2,700 was contributed with 19 gifts to our spring 2015 appeal. The successes and achievements of the Gamma Chapter are directly attributed to the support and involvement of its members. The active brothers are grateful for and proud of the support they receive from their alumni. We hope more alumni will join their brothers and contribute to our ongoing annual campaign.

Agriculture at Gamma

I was a student in the wildlife and fisheries science program, and thus, the College of Agricultural Sciences. Gamma found me through a recruiting letter sent to every freshman in the college, with Greek characters on the letterhead that I would later recognize on the front of a portico on a random walk down fraternity row. Not having anything else going on, I decided to investigate and was pleasantly surprised to find a group of welcoming, enthusiastic gentlemen to whom I immediately looked up. I was instantly hooked on the warm, social environment of the chapter.

I eventually did wind up in the zoo field after graduation (albeit with a non-“ag” recreation, park, and tourism management degree), and I currently serve as the lead herpetologist for the Virginia Aquarium and Marine Science Center in Virginia Beach. My professional responsibilities are significantly more agricultural than I ever would have predicted. Reproductive biology, nutritional analysis of animal foods, water and soil quality monitoring, and genetics are just a few of the ag skills I utilize daily to maintain the health and happiness of hundreds of reptiles and amphibians. The animals under my care serve a very important purpose: to act as ambassadors for their species and their habitats, to raise public awareness for threats to their long-term survival, many of which, to be blunt, are the result of agricultural activities. The worlds of industrial-scale agriculture and environmental conservation are often at odds in the media, the legislature, and the courtroom. Beyond performing the daily minutiae of exotic animal husbandry, the greater purpose of my career is to facilitate a dialogue between these two ideological factions, centered on finding empathy for the opposing perspective, cutting through the media

Colin Walker '04 (Γ1501) assisting the Komodo Survival Program with population distribution and growth analyses of the wild dragons of Komodo National Park, Indonesia, April 2014.

biases and inflammatory rhetoric, and reaching a civil consensus. Thanks to the exposure to the agricultural community I received through the people I met both in and through Alpha Gamma Rho, I, as a public communicator of environmental issues, am far more able to provide a dispassionate, objective point of view than I would have been otherwise. -Colin Walker '04, (Γ1501)

When I joined Gamma Chapter in the fall of my freshman year, I quickly learned about our roots in agriculture and about the importance of ag in our house, at Penn State, and ultimately for the greater good of humanity. Although I am pursuing a degree in civil engineering, I am involved with agriculture through Penn State's Humanitarian Engineering and Social Entrepreneurship (HESE) program. The goal of the class is to create sustainable ventures that combat humanitarian issues, such as food scarcity and global health. Last summer, my classmates and I traveled to Zambia where we constructed greenhouses in five rural communities. My part in the project was to create a decision support tool to help the farmers transition from conventional, open air farming to greenhouse farming. The purpose of the tool is to guide farmers through the preparation, planting, nurturing, and harvesting phases so they can ultimately maximize their yield and increase their profits. This support tool will be used in current and future greenhouses throughout Sub-Saharan Africa. ATP certainly had a strong influence in my decision to join the HESE program and to get involved with agriculture. -Shae Ferguson '12 (Γ1624)

GAMMA CHAPTER BROADENS HORIZONS, ACHIEVES GREATNESS

My name is Sarp Engelman, and I am the noble ruler for the 2015 calendar year. Gamma Chapter is doing better than ever. We are broadening our horizons and making progress to achieve many of the goals we have set forth. Gamma is now creating a greater number of better men than ever, with a record number of active brothers. Including our new members, we have reached 100 brothers! Our chapter has excelled in many areas, including philanthropy, academics, and athletics. The active brothers and alumni of Gamma Chapter have gone above and beyond to make this chapter successful. Gamma Chapter is one of the leading members of the Penn State Greek community. I would like to congratulate all the members of Gamma Chapter on their hard work, and I hope we can achieve even more greatness in the future.

Fraternally,
Sarp Engelman '13 (Gamma 1651)
 Noble Ruler

(Left) Adam LaCaria '13 (Gamma 1640) received the 2015 Martin Rockwell Award, which was handed off by Bill Nichol '50 (Gamma 603).

House Improvements Continue, Gamma Chapter Legacy Remains

The actives continue to uphold and better our house. This summer, brothers **Mckenzie Gary '13 (Gamma 1626)**, **Peter Majewski '13 (Gamma 1653)**, and I volunteered our time and constructed a new bench that wraps around the deck. The project took approximately four days and many long hours in the summer sun. It fits nicely onto our deck, which was built by brothers in 2014. It is almost instinctive to sit down on the bench, and most brothers are in disbelief that we did not build this addition earlier. It will certainly be enjoyed by actives and alumni for years to come.

Other summer projects included the installation of new shower curtains and rods. During this school year, brothers have continued their commitments to the house's betterment by replacing the old carpets with new hardwood floors. We have also replaced our broken fryers and ice machine with new, state-of-the-art equipment. We thank all of our alumni for the continued support of our house, its betterment, and Gamma's future successes.

Fraternally,
Dylan Lord '13 (Gamma 1654)
 VNR Maintenance and Operations
 dylan.lord113@gmail.com

Brothers Mckenzie Gary '13 (Gamma 1626), Peter Majewski '13 (Gamma 1653), and Dylan Lord '13 (Gamma 1654) volunteered their time and labor during summer 2015 to build a bench on the deck of the Gamma chapter house.

Finances on Track

This semester finances are in good shape, and the budget for fall 2015 has been finalized. The total house bill for fall 2015 was \$4,800. Spending has been moving at an appropriate pace so far, and in-house dues are set to increase in the spring 2016 semester while out-of-house dues are likely to decrease.

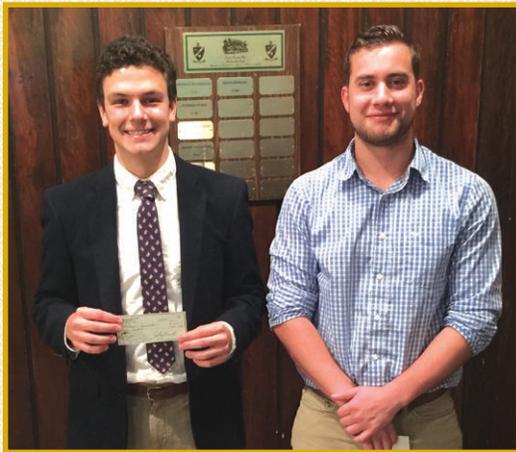

Fraternally,

ACADEMIC PERFORMANCE OF AGP SOARS IN PURSUIT OF EXCELLENCE

Adam LaCaria '13 (Γ1640) and Aaron Sosnader '14 (Γ1678) both earned a 4.0 for the spring 2015 semester.

Ten of the 23 AGP brothers who made Dean's List for the spring 2015 semester.

As the vice noble ruler of scholarship, it is my job to help facilitate the academic growth of our brothers. Thankfully, my job is very easy due to the importance that every single brother in our chapter places on education. In the spring 2015 semester, we had 23 brothers earn Dean's List recognition with GPAs above a 3.5. We also had 50 out of 84 brothers who achieved a GPA of 3.0 or above. Due to this academic performance, we are not only one of the highest performing chapters at Penn State, but we are also one of the best performing chapters of Alpha Gamma Rho. Our pursuit of academic excellence can be seen through our cumulative chapter GPA of a 3.13, which is above the Penn State Fraternity GPA average of a 3.0. It is our hope that you see the support you give us is used to better ourselves so that one day we, too, may be fortunate enough to give back. Thank you, alumni, for your support

through scholarships, advice, and uplifting praise. We will continue to honor the academic traditions of the Alpha Gamma Rho fraternity in the upcoming semesters. Congratulations to the following Gammas for making the Dean's List for the spring 2015 semester.

GAMMA CHAPTER STRIVES TO STRENGTHEN BROTHERHOOD

Thirty-Two New Members Join AGP in Fall 2015

This fall, Gamma Chapter welcomed 32 new members who demonstrate diligent effort in both the brotherhood and the classroom. Throughout the semester, they have played a pivotal role in planning, organizing, and running multiple philanthropies and events for the brotherhood. From an academic standpoint, there has been an immense focus on the importance of scholarship. In addition to excelling in the classroom, many of the new members have shown interest in pursuing a career in the field of agriculture.

through understanding of AGP history and development through the online AGRconnect modules. This new member class has already become an integral part of Gamma Chapter. Each new member has developed a deep interest in Alpha Gamma Rho and understands the focus on bettering the house to make better men.

Fraternally,
Peter Majewski '13 (Γ1653)
 VNR Membership Development

Gammas celebrate a strong brotherhood and the start of a new semester.

Every new member has been creating close bonds with active brothers, as well as a

AGP Maintains Positive Presence on Campus

Gamma Chapter has been maintaining a strong, positive presence at Penn State. We had a successful Homecoming with the Phi Sigma Sigma sorority and had our annual hayride. This is an event where we take a hayride through the mountains to a bonfire site. At this site, we have live country music, s'mores, hot cider, and plenty of barbecue. Now we are all looking forward to our next paired event, Greek Sing. Last year, we placed second, but we hope with the help of the Delta Gamma sorority we can win first this year!

Fraternally,
Marc Gluberman '14 (Γ1658)
 VNR Activities
 mqg5358@psu.edu

Gamma brothers and the women of Phi Sigma Sigma work together on AGP's Homecoming float.

BRIGHT FUTURE FOR GAMMA BROTHERHOOD

The Gamma Chapter has successfully been through another great semester for recruitment. We have had more than 250 potential membership candidates visit our house and meet our brotherhood during the recruitment period. I am proud to announce that we have 32 new brotherhood candidates this semester. Gamma Chapter is continuing its mission to foster a strong, united brotherhood and has a bright future ahead of itself.

 shaeferguson17@gmail.com

HOPEFUL, CONFIDENT IN INTRAMURAL COMEBACK

After reaching the finals in IM softball last year, the team came in with high hopes this season. Unfortunately, we did not have similar success. We hope next year brings us better luck.

AGP didn't have an IM football team last year, so there were a lot of question marks coming to the season. After losing the first game, the team rebounded to win four straight games and made it to playoffs. Led by an overload of talent at the receiver position, we'll see if the team can make a push for the title.

The IM volleyball team finished with a winning record, but unfortunately didn't make it into the playoffs. Half the team will have graduated by next season, so we'll see if the new guys can step up next year.

In the coming spring semester, we have a lot of confidence in our basketball and soccer teams. The basketball team brings back a lot of talent, as well as guys who played last year or were injured last year, and some great new brothers. The soccer team made the finals this year, and even though a couple key players graduated, there are still plenty of great players.

Fraternally,
Michael Scattergood '13 (Γ1648)
 Intramural Chairman
 mookscat@yahoo.com

ACTIVES REACH OUT TO ALUMNI FOR PHILANTHROPIC SUPPORT

My name is **McKenzie Gary '13 (Γ1626)**, and I've been working very closely with my THON co-chairman, **Ben Apuzzo '14 (Γ1674)**, along with the sisters of Omega Phi Alpha, to raise money for children with pediatric cancer. Last year, the brotherhood of the Gamma Chapter managed to raise \$28,128. This year, we've been working on ideas to raise even more money. THON has raised more than \$127 million for the Four Diamonds Fund at Penn State Hershey Children's Hospital since 1977, and we ask for your generous support to help us fight for a cure.

If you have any questions, know of any corporations that would be interested in donating, or would generally like to talk about THON, please contact me at mackdgary@gmail.com or Ben at benapuzzo@gmail.com.

For the Kids,
McKenzie Gary '13 (Γ1626)
THON Co-Chairman
phatcatkid@yahoo.com

There's nothing more exciting than a 10 a.m. alumni board meeting...in new furniture!

Tom Nicchi '99 (Γ1430) with Aziz Ansari at his comedy club, The Comedy Works, in Albany, N.Y. Ansari was so impressed with their local club that he scheduled additional performances.

ALUMNI UPDATE

CHAPTER ETERNAL

Howard Busch '37 entered Chapter Eternal on September 15, 2014. He served in WWII and retired as a colonel. After his service to the military, Howard worked with the U.S. Soil Conservation Society. He was a life member of the Penn State Alumni Association, the Nittany Lion Club, the Penn State Pioneers, the Retired Officer's Association, and was the director of the Hoxie Harrison Smith Foundation. He is survived by his wife, Sara; his daughter, Barbara; and his grandchildren.

Wallace Dunlap '38 entered Chapter Eternal on May 7. Wally was preceded in death by his wife, Sarabell, who passed away on April 3. He was a faithful member of the Zion Lutheran Church and a lifetime member and supporter of the Penn State Alumni Association. He is survived by his four children and eight grandchildren.

Torrence "Bill" Dohl '48 entered Chapter Eternal on April 11 in Venice, Fla. After serving in the Army and seeing action in the battles of Leyte and Okinawa, he came back to Pennsylvania and attended Penn State University. He moved to Lancaster to work for New Holland Machine Company in the service department after graduating in 1950, where he met Doris Nestel. They were married in 1951. In 1959, he was sent to open a baler factory in Lyon, France, taking his family along. Bill was responsible for the development of the New Holland Sperry expansion throughout Europe, including the purchase of Clays Combine Co., Belgium, and was the director of European operations for New Holland before coming back to Lancaster in 1969. In 1971, Bill and his wife and daughter moved to Lebanon, Ohio, to run the short-lived New Holland Special Products Division. After management changes at the top of New Holland, he left and moved to Chicago. Bill finished his career as head of the Arnolt Corporation in Warsaw, Indiana. After retiring, Bill and Doris moved to Venice, Fla. He is survived by his wife, Doris; his children, Torrence W. "Terry" Dohl Jr. and Cynthia L. "Cindy" Dohl; a grandson, Thomas O. "Tod" Dohl and his wife, Tashauna; his great-grandsons, T.O. Dohl Jr. and W. Sullivan Dohl; as well as two sisters, Barbara Beach and Louise Palmetier.

Penny Hallowell '48 (Γ571), Bill Nichol '50 (Γ603), and Bill Yerkes '49 (Γ592) remember Bill Dohl '48 (Γ561) with great fondness.

Frank Hogeland '50 entered Chapter Eternal on May 26. He was very involved in pastoring, farming, gardening, training horses, and spending time with his grandchildren. He is survived by his loving wife of 64 years, Dorothy; his children, Kathy, Wayne, Carol, Barbara, and Ruth; his 15 grandchildren; and his 12 great grandchildren.

George W. Ridge '54 entered Chapter Eternal on January 12. He was a test developer for farm equipment and received three patents for his work. George was also a co-owner of Black Bear Truss Company. He served as a deacon at Friends Lutheran Church, Liberty, and Grace Lutheran Church. He is survived by his sister, Alice; and 13 nieces and nephews.

Russell Till '63 entered Chapter Eternal in February while vacationing in Puerto Rico. He is remembered for being patient, funny, adventurous, and kind. Russell is survived by his loving wife of 46 years, Mary Ellen; his daughter, Jennifer; and granddaughter, Martha Catherine.

ALUMNI NEWS

George Olmstead '56 recalls that Gamma opened doors of opportunity. His career was extremely interesting, challenging, and rewarding. "On every job you should be willing to work hard, have objectives, seek knowledge, persevere, and treat people respectfully." George can remember a prime pledge objective was to get **John Akers '55** into a car, which contained only pledges, for a ride he would long remember. Objective accomplished!

Lynn Dietrich '70 received Penn State's Distinguished Alumni Award, the university's highest individual award, which salutes alumni whose personal lives, professional achievements, and community service exemplify the objectives of their alma mater. Lynn is the director of global engineering and the Engineering Centers of Excellence for Manitowoc Cranes. He resides in Chambersburg, Pa., with his wife, Joyce.

Congratulations, Lynn Dietrich!
